SPOTLIGHT ON

Automatic data capture, mobile computing

Robust mobile computer with 5-inch HD display

Rugged and robust, the DL-Axist handheld computer runs the Android operating system and incorporates a Corning Gorilla Glass full-touch, 5-inch high-definition display and 2D imager. It includes the supplier's proprietary SoftSpot technology, a user-definable floating soft trigger that can be located at the most comfortable position anywhere on the touch display to activate a choice of functions. Other highlights include MIMO technology for extensive indoor throughput and coverage from its Cisco CCXv4 certified 802.11 a/b/g/n WiFi radio; 3G/4G cellular radio for outdoor voice and data communication; an IP67 rating; and a 6-foot drop to concrete rating with a rubber boot for additional protection. **DataLogic**, datalogic.com.

Ultra-rugged mobile computer for cold storage, freezer environments

The CK75 ultra-rugged mobile computer is optimized for demanding warehousing, distribution center and manufacturing environments. When equipped with a heater, it can operate in cold storage and freezer environments. Lightweight and ergonomic, the device can run either Windows Embedded Handheld 6.5 or Android 6 operating systems. **Honeywell**, honeywellaidc.com.

Portable logistics computers get new, more durable touchscreens

The VERSO+ 10 and JLT1214P compact logistics computers are now equipped with new PowerTouch displays for increased durability and productivity. They provide an interaction experience similar to that of consumer devices, but include a 0.07-inch thick, chemically toughened glass cover, which makes the screens more resilient for resistance to scratches, scuffs and breakage. Further, the computers aren't susceptible to wear or failure in areas where keys are regularly pressed, making them ideal for use with virtual keyboard technology for easier data entry. They can also be operated with gloves of different materials and thicknesses. **JLT Mobile Computers**, jltmobile.com.

Lightweight handheld bar code terminal

Weighing 4.5 ounces, the new BHT-1500 handheld bar code terminals are compact, drop-resistant and backed by a three-year warranty. The durable device has a large, 2-inch color screen and includes a full suite of preinstalled software that supports out-of-the-box data collection. For one-hand operation, the unit features a contoured handle and ergonomic keyboard that minimizes fatigue and increases efficiency. Communications capabilities include USB for direct connection to a PC, and IrDA for wireless cloning of devices. Optional device cradles allow communication over Ethernet, USB or RS-232C. **DENSO**, denso-adc.com.

Rugged mobile computer operates seamlessly in changing weather

The new Algiz 8X ultra-rugged tablet computer features an 8-inch projective capacitive touchscreen that is ultra-bright and built for outdoor use. Outfitted with LTE and dual-band WLAN communication, the device can be switched to glove or rain mode for seamless operation in changing environments, including washdowns or precipitation and temperatures from -4°F to 140°F. IP65-rated for

dust and water ingress, the device also features a rear-facing, 8 megapixel camera with auto focus and LED flash. For further customization, it can be equipped with LAN port, COM port or bar code scanner. **Handheld US**, handheldgroup.com.

Cost-effective, IP65-rated tablets offer durability, security

Offered as an alternative to consumer-grade tablets, the DT395CR and DT395GS rugged tablets are engineered for durability to withstand extreme environments and eliminate broken attachments. The devices can be used in indoor and outdoor environments with anti-reflection displays, IP65 and MIL-STD-810G rated to withstand 4-foot drops and temperatures from -4°F to 140°F, the tablets also resist water, dust and humidity. They feature an 8.9-inch display with 1920 x 1200-pixel resolution and capacitive touch. Weighing 2.87 pounds, the tablets run on an Intel Atom Quad Core central processing unit with 4 GB of RAM and feature the Microsoft Windows 10 IoT Enterprise operating system. **DT Research**, dtresearch.com.
